SCHEDULE A

SERVICES

This Statement of Work ("SOW"), is entered into effective as of March 26, 2018 (the "SOW Effective Date") between ████nt ████ys ████ governed by the General Terms and Conditions attached hereto as Schedule B. Capitalized terms not defied in this SOW are as defined in the General Terms and Conditions.

1.   SCOPE OF SERVICES

Sapient will provide staff augmentation resources ("Sapient Personnel") with program management, business, technical and programming skills described in this SOW to provide application development support, application testing support, and application project management support services and such other services reasonable required by Thesys as part of the Consolidated Audit Trail ("CAT") project ("Services"). The indicative features of the Services will include, but not be limited to:

- Development and testing services around user-defined direct query tool to query permissioned data sets, support complex, multistage queries as well as refine subsequent queries.
- Support Thesys team in creation of an open API that allows users to use analytic tools
- Support Thesys team to build functionality in the user-defined query tool data which includes (but not limited to) presentation tools, workload balancing, query scheduling and automated result delivery.
- Support Thesys team on meeting performance SLA defined for CAT with respect to daily query volumes, concurrent queries support and SLA around bulk extracts.

As part of the Services, the Sapient Personnel will be expected to:
- Design, develop, and unit test application code for the aforementioned features at Thesys' direction:
  - Enhance and develop (code, test, document, and release) front end user interfaces ("UIs") and web services layer, and
  - Participate in deployment activities.
- Apart from technical services provided, the scope of this SOW will also contain program management services provided to the Big Data and other parts of the CAT program.
- Participate in release planning activities, including scope prioritization, work estimates and assignment, scheduling / key milestones, and issue resolution as required

The following services are out of scope:
- Administration and management of environments and/or databases.
- Specialized testing services involving functional and or UI testing.
- Access to the CAT System and CAT Data (as defined in Schedule B).
